PROFESSIONAL SUMMARY

Versatile Java Full Stack Developer with comprehensive experience in designing, developing, and maintaining web applications. Strong understanding of both front-end and back-end coding languages including Java, JavaScript, HTML/CSS, SQL databases and RESTful APIs. Proven ability to manage complex projects while demonstrating exceptional problem-solving skills and attention to functionality. Previous work has shown significant improvement in system efficiency and user experience.

SKILLS

Backend: Java 8+, Spring Boot, Spring Framework, Hibernate (JPA), REST APIs, Spring Security, JWT Authentication
Frontend: React.js, JavaScript, TypeScript, HTML5, CSS3
Databases: MySQL, MongoDB, PostgreSQL
Tools & Technology: Git, Maven, Docker, Postman, CI/CD
Concepts: OOP, DBMS, Data Structures, SDLC, Agile Methodologies

WORK EXPERIENCE

Java Full Stack Developer Yess Infotech, Pune	Oct 2025 – Apr 2026
- Engineered backend modules using Java and Spring Boot, reducing API response time by 25% - Created RESTful APIs to streamline user workflows and improve application scalability - Applied JWT authentication and Spring Security for secure user authorization - Streamlined MySQL queries, increasing database efficiency and reducing query execution time - Debugged and resolved backend issues, minimizing application runtime errors - Collaborated with developers in Agile environment to accelerate project delivery	
Full Stack Developer Zoblik international, Pune	Jan 2024 – Sep 2025
- Built dynamic web applications using React.js and Spring Boot, increasing application responsiveness by 30% - Integrated REST APIs and backend services, reducing data retrieval time and boosting system efficiency - Refined UI/UX design for seamless responsiveness across mobile, tablet, and desktop devices - Strengthened application performance through code refinement and modern development practices - Configured authentication systems and managed secure database operations for user access control	
Web Development Intern CodeClause, Pune	Jan 2023 – Dec 2023
- Designed responsive frontend interfaces using HTML, CSS, and JavaScript, increasing cross-device compatibility by 35% - Refined UI/UX design, decreasing page load time by 20% and increasing user engagement - Contributed to real-time web projects by adding frontend functionality enhancements - Resolved frontend bugs and streamlined code for faster website responsiveness and stability - Collaborated using Git and GitHub version control in Agile development workflows	

PROJECTS

Banking System Web Application	Link
<i>Tech Stack: Java, Spring Boot, MySQL</i>	
- Designed and engineered a secure banking system for account and transaction management - Developed REST APIs for deposits, withdrawals, and transaction history operations - Applied JWT authentication, validation checks, and exception handling mechanisms - Streamlined database schema structure to maintain secure and efficient data integrity	
Job Portal Web Application	Link
<i>Tech Stack: Spring Boot, React.js, MySQL</i>	
- Built a full-stack job portal platform for recruiters and job seekers - Configured role-based authentication and recruiter management dashboards - Connected frontend interfaces with backend REST APIs for real-time data processing - Boosted user experience and strengthened overall system responsiveness	

EDUCATION

Bachelor of Engineering (Electronics & Telecommunication)	(2023 – 2026)
Sapkal Knowledge Hub College of Engineering, Nashik	CGPA: 7.91
Diploma in Computer Engineering	(2019 – 2021)
MSBTE	Percentage: 76.63%

CERTIFICATIONS

- Advanced Java Development
- React.js Development
- Full Stack Web Development
- Spring Boot Fundamentals
